Rudraksh K. Ramekar

React Native Developer — Cross-Platform Mobile App Developer

+91 84460 19033 | workrudrx75@gmail.com | LinkedIn | GitHub | Portfolio | Amravati, Maharashtra

Professional Summary

React Native Developer experienced in building cross-platform Android and iOS applications using React Native, Expo, and TypeScript. Skilled in REST API integration, scalable mobile architecture, reusable UI components, offline-first development, and performance optimization. Focused on building intuitive, user-centric mobile experiences with strong attention to UI/UX and product design.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3

Mobile Development: React Native, Expo, Expo Router, React Navigation, Android SDK, Android Studio

Frontend: React.js, Next.js, Tailwind CSS, NativeWind, ShadCN UI, Framer Motion

Backend & DB: Node.js, Firebase RTDB, Firestore, REST APIs, SQLite, Realm, MySQL, MongoDB, Supabase

State Mgmt & Libraries: React Hooks, Context API, Reanimated, Gesture Handler, AsyncStorage, RN SVG

Tools: Git, GitHub, VS Code, Postman, Figma, Blender, Claude Code

Projects

Smart Switch – Smart Home IoT Controller May 2026 – June 2026
React Native, Expo, Firebase, ESP32, TypeScript *GitHub*

- Built a real-time IoT mobile app to remotely control appliances via ESP32-based controllers.
- Integrated Firebase Realtime Database for device synchronization and controller monitoring.
- Designed responsive dashboards with custom device cards, animations, and reusable components.

Spicetify Party – OpenSource Collaborative Listening Extension Sept 2026 – Nov 2026
Spicetify, React, TypeScript, Supabase, PostgreSQL, Realtime *GitHub*

- Built a Spotify Desktop collaborative listening extension using Spicetify, React, and TypeScript with an in-app Party experience.
- Implemented 6-character party codes, member presence, host-controlled playback sync, and real-time party state with Supabase.
- Built PostgreSQL-backed profiles, party membership, playback state, and collaborative queue infrastructure with RLS.

SummarIQ – AI-Powered Text Summarizer Project
Next.js, React, Google Gemini AI, Tailwind CSS *GitHub* | *Live Demo*

- Developed an AI-powered text summarization web application using Next.js and Google Gemini AI.
- Implemented Normal and Abstracted summarization modes to generate concise, readable summaries.
- Designed a clean, responsive interface with Tailwind CSS and structured, justified summary output.

Experience

Mobile Application Developer July 2026 – Oct 2026
ANIX AI *India*

- Developed the KATIC LMS mobile app using React Native, Expo, and TypeScript.
- Built course discovery, enrollment, learning, progress tracking, certificates, and video learning with playback controls.
- Integrated REST APIs for authentication, courses, enrollments, progress, certificates, and media.
- Built reusable, responsive UI components with consistent theming and cross-platform support.

Android Developer Intern Jun 2023 – Sep 2023
Mout Reach Solutions Pvt. Ltd. *India*

- Developed Android applications using Java and Android SDK following clean architecture practices.
- Designed responsive, user-friendly mobile interfaces focused on usability and performance.
- Integrated APIs like Google Maps and features based on business requirements.

Education

B.E. in Computer Science & Engineering (Data Science) 2024 – 2027
Sant Gadge Baba Amravati University *Amravati, MH*

Diploma in Computer Engineering 2021 – 2024
Maharashtra State Board of Technical Education *77.37%*

Senior Secondary (Class X) 2020 – 2021
Central Board of Secondary Education *82.00%*

Certifications

AWS Academy Graduate – Generative AI Foundations, AWS Academy | 2025 View Credential

Databricks Fundamentals Accreditation, Databricks Academy | 2025 View Credential
